

# Tattoo aftercare instructions

- Leave tattoo wrapped for one to two hours.
- Wash your tattoo gently as needed with an antibacterial soap. (Such as Dial)
- Pat dry with a clean papertowel and let air dry for 15 minutes.
- Apply a very thin layer of ointment.  
(We recommend our product, Hustle Butter or Aquaphor)
- After 7 days, switch to an unscented lotion.

## Do not:

- ...Submerge or soak tattoo until all scabbing & flaking is done. No pools, hot tubs, baths, etc.
- ...Overdo the ointment. If it's shiny, it's too much.
- ...Expose your tattoo to direct sunlight while it heals.
- ...Pick or scratch your tattoo while it is healing.
- ...Take any advice from your friends.

**A**fter you leave the shop, it is completely up to you how your tattoo will heal. Keep it clean & treat it as an open Wound. Call us if you have any questions regarding your tattoo or these instructions.
